

The City of Daytona Beach
Public Works Department

TO: James V. Chisholm, City Manager
FROM: David Waller, Public Works Director
DATE: November 21, 2017
SUBJECT: Replace Lower Boom Assembly on Unit 4900 – **Sole Source**

REQUEST:

Public Works Department requests the City Commission adopt a resolution approving repairing the lower boom assembly for Unit 4900 assigned to the Traffic Division to Altec Service Group, 2750 Imeson Road, Jacksonville, FL 32220 in the amount of \$32,987.92.

PURPOSE:

The purpose of this request is to replace the lower boom assembly for Unit 4900 because it could not obtain OSHA certification.

CONSIDERATION:

OSHA regulations require that all bucket and lift trucks be inspected and certified annually by vendors that specialize and are approved by OSHA to perform this work.

Unit 4900 was inspected and found it did not meet OSHA regulations so it could not be certified. Specifically, the complete lower boom assembly was corroded to the point where it could not be repaired. Thus, the need to completely replace the lower boom assembly is necessary. The truck chassis and upper boom assembly are in good condition.

Sole source is justified for the request because Altec Service Group is the original manufacturer and has the lower boom assembly specifications for fabrication.

FUNDING:

Funds are available in account 001-600300-541-546001-000000.

RECOMMENDATION:

Public Works Department recommends the City Commission adopt a resolution approving repairing the lower boom assembly for Unit 4900 assigned to the Traffic Division to Altec Service Group, 2750 Imeson Road, Jacksonville, FL 32220 in the amount of \$32,987.92.

SCHEDULE:

Commission Approval
