Large Scale Comprehensive Plan Amendment

DEV2017-148

Project Beta

Staff Report

DATE: March 22, 2018

TO: Planning Board Members

FROM: Doug Gutierrez, AICP, Senior Planner

PROJECT REQUEST

A request by Robert A. Merrell III, Esq., Cobb Cole, on behalf of John P. Albright, Consolidated-Tomoka Land Co., for approval of a Large Scale Comprehensive Plan Amendment (LSCPA).

PROJECT DESCRIPTION

Proposed Amendment to the Future Land Use Map and Neighborhood "S". The parcel consists of 14.65± acres which the applicant proposes changing the Future Land Use Map designation from Level 3 Residential to General Industrial and limit the Floor Area Ratio (FAR) to 0.6.

The applicant requests to amend the Future Land Use Map designation for the property in order to develop as heavy industrial, light industrial, office uses and other uses permitted under general industrial and limit the FAR to 0.6. The site is generally located north of Dunn Avenue and West of Mason Avenue is currently undeveloped.

PROJECT ANALYSIS

The adjacent land uses and zoning classifications for the parcels are illustrated in the following table. This parcel is outlined on the attached location and aerial maps (Attachment A).

Table 1: Land Use and Zoning

	Existing Uses	Existing Future Land Use Designation	Existing Zoning Classification
Site	Undeveloped	Level 3 Residential	MFR-20
North	Undeveloped	General Industry	MFR-20
South	Indigo Lakes	Level 1 Residential	MFR-20
East	Carolina Club	Level 3 Residential	MFR-20
West	Undeveloped	Level 3 Residential General Industry	PD-G

Conformance with Comprehensive Plan

The applicant has requested that the Future Land Use Element future land use designation for this property be amended from Level 3 - Residential to General Industry. Policy 1.1.2 describes the General Industry designation as shown below.

Policy 1.1.2 General Industry. An area generally containing industrial, office, and service related activities of a larger scale and serving regional and national markets. In addition, amusements located in planned zoning districts may be permitted. Floor area ratio not to exceed 0.7.

Neighborhood "S"

(k) Issue: The undeveloped property located north of Dunn Avenue on either side of Mason Avenue, Having a Volusia County Parcel Identification Number of 5215-00-00-0063, is located in close proximity to a number of major thoroughfares.

(1) Policy: In an effort to reduce the effects of development on these roadways, development on the property shall have a maximum FAR of 0.60.

Neighborhood Input

The neighborhood meeting was held at the Holiday Inn Daytona Beach LPGA in their conference room at 137 Auto Mall Circle, Daytona Beach, FL on February 15, 2018, the applicant summary stated that the meeting was well attended and the only concern was regarding recent flooding the had experienced on their property. (Neighborhood meeting summary Attachment B).

Impact Analysis

Urban services necessary to serve this site and the concurrency process requires that adequate capacity be available for new development prior to the approval of final development orders. The current Future Land Use designation of Level 3 Residential allows for a density of 40 dwelling units per acre (DU/AC). The proposed Future Land Use of General Industry allows a FAR of 0.7 and no residential density. The proposed amendment to Neighborhood "S" will reduce the FAR to 0.6.

The following are results for water, waste water and traffic impacts that could be generated by the property by the most intense land use allowed under the current land use map designation and the proposed land use change. The detailed data and analysis are in the attached project analysis provided by the applicant (Attachment C).

The City's potable water treatment plant has sufficient capacity (24.0 MGD) to accommodate the proposed Future Land Use designation. The current maximum daily flow is 15.15 MGD and the proposed amendment results in a net decrease in demand of 175,800 GPD.

The City's waste water treatment plant servicing this site has sufficient capacity (15.0 MGD) to accommodate the proposed Future Land Use designation. The current maximum monthly annual daily flow is 8.8 MGD and the proposed amendment results in a net decrease in demand of 175,800 GPD.

The current future land peak hour trip generation is 248 trips. The proposed Future Land Use Map amendment and Neighborhood "S" amendment peak hour trip generation is 247 trips will result in a net decrease of 1 daily trip from the maximum allowed by the current land use.

Urban Sprawl

In general terms and as directed by Florida Statutes and rules of the Florida Administrative Code, key urban sprawl indicators include leapfrog development, premature development, and development that does not make efficient use of urban services. Local governments are responsible for ensuring that their actions do not further urban sprawl. This amendment does not represent leapfrog development. It is located in an area of general industrial, conservation and residential uses with existing urban services that may be suitable for development. This amendment does not represent premature development. Central water and sewer services have the capacity to serve the subject property and the property is accessible through the existing road network. The traffic generation calculations presented in this staff report indicates average daily trips will decrease if the proposed amendment is approved.

Consistency with the Comprehensive Plan Goals, Objectives and Policies

Objectives and Policies of the Comprehensive Plan that are relevant to this application are listed below:

Future Land Use Element

Goal 1: To achieve a future land use pattern that provides for sufficient supply of land to meet growth demands, ensures that land uses are located in a rational and efficient manner, and promotes economic development.

Policy 1.2.1 Traffic: The Land Development Code shall be maintained in a manner that will cause future major traffic generators to be located in close proximity with thoroughfares, which have the capacity to carry the additional traffic generated by such developments. All future rezoning shall be consistent with this policy.

Objective 1.3 Commercial Land: The City's supply of commercial land shall be sufficient to accommodate both local demand and the demand for regional facilities, since the City of Daytona Beach is the central city in Halifax metropolitan area.

Policy 1.3.2 Through site plan and plat reviews, traffic generated from future commercial and industrial development shall be directed away from residential areas.

Objective 1.4 Economic Base: Achieve a diversification of the City's economic base so that light industrial and business employment and other clear basic economic activities will have increased 10% by the year 2015.

Transportation Element

Goal 1 To promote safe and efficient traffic circulation serving existing and future land uses.

Objective 1.7 Future Land Use Controls: Maintain a land use pattern that supports and is compatible with the function of the roadway system that is designed to serve it. Higher trip generators are to be located adjacent to and at the intersections of arterial roadways with lower trip generators located adjacent to collector and local streets.

Objective 1.8 Residential Impacts: No street improvements shall adversely impact single-family areas.

Economic Element

Goal 2 Business and Employment: Retain, expand and attract industries, companies and businesses that provide high paying jobs with benefits for residents and that would create opportunities for business spin-offs and expansions, particularly those that would establish the City of Daytona Beach as a center for high technology design.

Objective 1.1 Retain, expand and attract industries, businesses and jobs, particularly in the City's targeted industries, such that the area average annual wage increases from the previous year.

Targeted Industries include: telecommunications, environmentally clean manufacturing, information technology, medical products, treatment and technology, boating, marine production and supplies, automotive and speed related sports industry i.e. motor sports, golf, tennis, aviation and related events.

Policy 1.1.1 Increase the percentage of higher paying industries and jobs such that the average annual wage increases from the previous year.

Policy 1.1.2 Increase the number of industries, business and jobs in the identified Targeted Industries such that the average annual wage increases from the previous year.

Policy 1.1.8 The EDAB shall encourage development of pre-permitted "shovel ready" building sites.

Policy 1.1.9 Facilitate and support opportunities for business spin-offs, expansions and/or recruitment particularly in Targeted Industries.

Policy 1.1.10 Encourage Volusia County and the Chamber to pursue opportunities to add targeted industries and high paying jobs in the City.

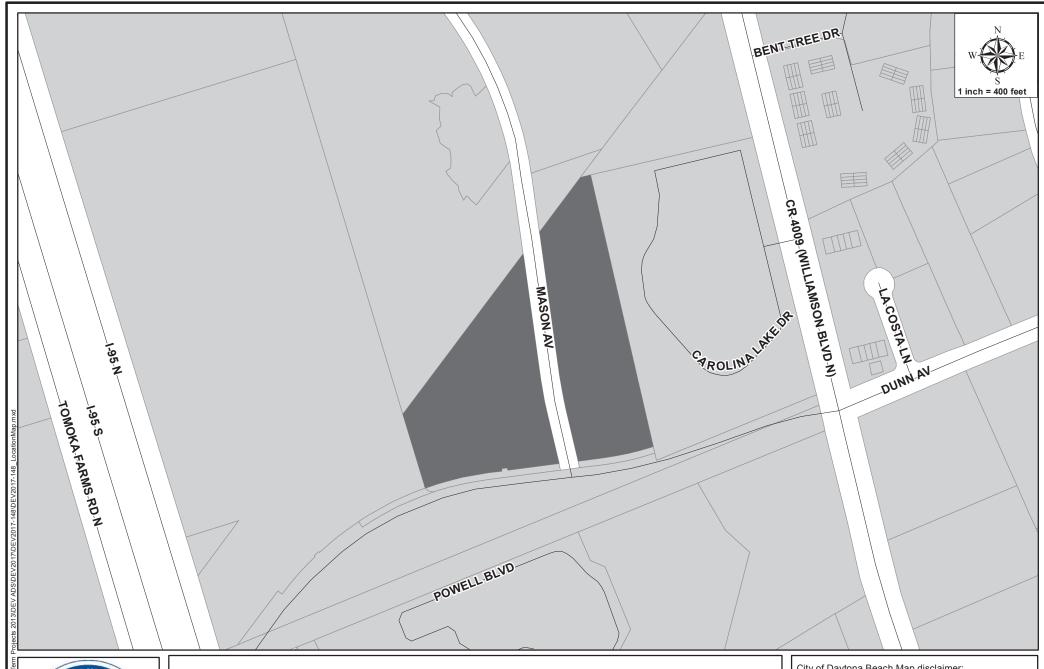

RECOMMENDATION

Staff finds that the large scale amendment is consistent with the Comprehensive Plan, does not represent urban sprawl and the City has available capacity to serve the demand on available water and sewer.

Based on staff analysis and review, the proposed Future Land Use Map amendment from Level 3 Residential to General Industry and amendment to Neighborhood "S" adding Issue (k) and Policy (1), limiting the FAR to 0.6 appears to meet criteria for the proposed amendment.

A majority vote of the Planning Board members present and voting are required to recommend approval, approval with conditions or denial of this policy matter to the City Commission.

Panned Development-General Rezoning and Large Scale Comprehensive

Plan Amendment DEV2017-148 & 149

Subject: Neighborhood Meeting Summary – February 15, 2018

A neighborhood meeting was held in the conference room of the Holiday Inn Daytona Beach LPGA, at 137 AutoMall Circle, Daytona Beach, FL on February 15, 2018 at 6:30 p.m.

Rob Merrell, Parker Mynchenberg, Matthew West, and Debi LaCroix were in attendance to explain the rezoning request. Lori and Harry Thompson, nearby neighbors, were in attendance. They are supportive of the project, and were only concerned regarding recent flooding they have experienced on their property. See attached Sign-In Sheet.

We look forward to this item being scheduled for the March 22, 2018 Planning Board and the May 2 and May 16, 2018 City Commission meetings.

Thanks.

Deb.

INVITATION TO NEIGHBORHOOD MEETING

Dear Neighbor:

The law firm of Cobb Cole has the pleasure of representing Consolidated-Tomoka Land Co. and Indigo Development LLC, the owner of 47.03+/- acres of property located on the West and East sides of Mason Avenue, just North of Dunn Avenue, as shown on the attached map. The owner intends to amend the Future Land Use Map and rezone the property for industrial and office uses.

As future neighbors to the proposed future land use amendment and rezoning, we would like to invite you to discuss these items on **Thursday, February 15, 2018 at 6:30 p.m.** in the meeting room of the Holiday Inn Daytona Beach LPGA, located at 137 AutoMall Circle, Daytona Beach, FL 32124

We look forward to seeing you at this meeting if you are interested in discussing this rezoning.

Sincerely

Robert A. Merrell III

2. Property Information

2.1 Nature of Applicant's Interest

The Applicants, Indigo Development LLC and Consolidated-Tomoka Land Co. are requesting a Large Scale Comprehensive Plan Future Land Use Map Amendment and a text amendment to "Neighborhood S". The subject property described in Section 2.3 (the "Property") is currently located within the "Level 3 Residential" Future Land Use (FLU) Classifications. The Applicants desire to create an industrial development through a Planned Development - General (PD-G) rezoning, which is being processed concurrently with this application.

The proposed development may include uses such as heavy industrial, light industrial, office uses, and other related uses permitted under the General Industrial FLU classification. This proposed map amendment will ensure that the industrial development will not result in an increase in trips on the roadway system serving the area surrounding the Property and that the maximum allowable peak

hour water and sewer use will not exceed that currently permitted under the existing Future Land Use.

2.2 Size of Property and Survey

The size of the Property is 14.65 +/- acres. Though, it should be noted, this is a piece of a larger property (the "Overall Parcel") that totals 47.03 +/- acres. This Amendment is proposing to amend the FLU Classification of the 14.65 +/- Property and to limit the FAR of the same. See the copy of the Sketch and Description attached as Exhibit "A".

2.3 <u>Legal Description</u>

See Legal Description and copies of Property Appraiser Information Cards, Deeds and Certificate of Conversion attached as Exhibit "B".

2.4 Parcel Identification Numbers

5125-00-00-0063

2.5 General Location

The Property is generally located in the City of Daytona Beach North of Dunn Avenue and West of Mason Avenue. See Location Map attached as Exhibit "C".

2.6 Frontage

The Overall parcel has approximately <u>577.84</u> feet of frontage along Dunn Avenue and approximately <u>863.88</u> feet of frontage along Mason Avenue.

2.7 Access

Street access and vehicular circulation will be provided via public and/or private rights of way within the Property. The Overall Parcel has frontage on Dunn Avenue and Mason Avenue.

2.8 Street Address

N/A

3. Land Use Information

3.1 Aerial Photography

See Exhibit "D", attached.

3.2 Existing Development

The Property is currently undeveloped. The northernmost boundary of the Property abuts vacant land. The easternmost boundary of the Property abuts property developed with the Carolina Club Apartments. Though it should be noted that the apartment complex is separated from the Property by a sizable landscape buffer. The southernmost boundary abuts Dunn Avenue and the westernmost boundary of the Property abuts the entrance drive to the Trader Joe's Distribution Center.

3.3 Current Zoning

The current zoning designation of the Property is MFR-20 "Multifamily Residential 20." See Existing Zoning Map attached as Exhibit "E". Applicant submitted an application to rezone the Property to PD-G concurrently with this application, which is consistent with the City's Comprehensive Plan, as amended herein.

3.4 Existing Future Land Use Map Designation

The current FLU designation is "Level 3 Residential". See Existing Future Land Use Map attached as Exhibit "F". There is a proposed change to the FLUM designation.

3.5 Proposed Future Land Use Map Designation

The proposed FLUM designation is "General Industrial".

3.6 Future Land Use Element Text Amendment

The proposed Future Land Use Element Text Amendment for Neighborhood S section of the Daytona Beach Comprehensive Plan will limit the Floor Area Ratio to be developed on the property to 0.60. The text amendment will add Issue (k) to Neighborhood S. The text amendment will provide the ability to develop the property consistent with the intended use but will limit any impact to the nearby multifamily uses, ensure fewer trips on the roadway system serving the area surrounding the Property, and reduce potential peak hour water and sewer use.

Neighborhood S

- (k) Issue: The undeveloped property located north of Dunn Avenue on either side of Mason Avenue, having a Volusia County Parcel Identification Number of 5215-00-00-0063, is located in close proximity to a number of major thoroughfares.
 - (1) Policy: In an effort to reduce the effects of development on these roadways, development on the property shall have a maximum FAR of 0.60.

4. Consistency and Compatibility

4.1 <u>Consistency with Plan Goals, Policies and Objectives of the Daytona Beach Comprehensive</u> Plan

The proposed amendment is consistent with several of the Goals, Policies and Objectives of the Comprehensive Plan, as outlined below. This amendment will allow development with uses that are consistent and compatible with the surrounding area and will allow for uniform planning, development and management of the Property. In addition to these factors, the amendment is also consistent with the following provisions of the Daytona Beach Comprehensive Plan:

Future Land Use Element

Goal 1: To achieve a future land use pattern that provides for sufficient supply of land to meet growth demands, ensures that land uses are located in a rational and efficient manner, and promotes economic development.

Goal 1 of the Future Land Use Element is to locate land use activities in a rational and efficient manner. This parcel is located within close proximity to the I-95/LPGA Boulevard and I-95/International Speedway Boulevard interchanges. These are major transportation nodes and an appropriate location for a development with opportunities for industrial uses and office uses. This Amendment will ensure an efficient land use pattern through the location of these uses in close proximity to this major transportation node where substantial investments have been made to the transportation infrastructure.

Policy 1.2.1 The Land Development Code shall be maintained in a manner that will cause future major traffic generators to be located in close proximity with thoroughfares, which have the capacity to carry the additional traffic generated by such developments. All future rezoning shall be consistent with this policy.

The Amendment will locate the developments within close proximity of the I-95/LPGA Boulevard and I-95/International Speedway Boulevard interchanges, providing an adequate capacity to carry traffic to be generated by the new industrial development. As discussed more particularly in Section 5 below, traffic impacts will result in a reduction in the traffic impacts of the Property's entitlements under the existing "Neighborhood S" policies and FLU.

Policy 1.3.2 Through site plan and plat reviews, traffic generated from future commercial and industrial development shall be directed away from residential areas.

This Amendment will locate industrial development near the I-95/LPGA Boulevard and I-95/International Speedway Boulevard interchanges. The development lies in an area largely developed with industrial uses but with some nearby residential uses. Due to the layout of the surrounding roadway system, traffic will be directed to either the interstate or a City arterial roadway. Thus, any traffic generated from the development will not adversely impact residential areas.

{045260-002: RPRIN/RPRIN: 02190858.DOC; 3}

Objective 1.4 Economic Base: Achieve a diversification of the City's economic base so that light industrial and business employment and other clear basic economic activities will have increased 10% by the year 2015.

The proposed Amendment will help Daytona Beach achieve and continue this objective by providing a development that has the opportunity for job creating industrial and office uses which will promote economic development and increase the city tax base substantially. The Applicant intends to establish this project as a prime location for businesses operating light industrial or office uses by providing a development with easy access to I-95.

Transportation Element (Traffic Section)

Objective 1.7 Future Land Use Controls: Maintain a land use pattern that supports and is compatible with the function of the roadway system that is designed to serve it. Higher trip generators are to be located adjacent to and at the intersections of arterial roadways with lower trip generators located adjacent to collector and local streets.

The Amendment will locate industrial development near arterial roadways and the I-95/LPGA Boulevard and I-95/International Speedway Boulevard interchanges, that support and are compatible with the function of the roadway system serving the industrial development. Additionally, the Amendment is consistent with Objective 1.7. as more particularly described in Section 5 below.

Objective 1.8 Residential Impacts: No street improvements shall adversely impact single-family areas.

This Amendment will locate industrial development near the I-95/LPGA Boulevard and I-95/International Speedway Boulevard interchanges. The development is in a largely industrial area, away from single-family areas. Thus, any street improvements that may be constructed as part of the development will not adversely impact single-family areas.

Policy 1.8.2 New commercial and industrial districts shall be located in accordance with the Future Land Use Map and be in such a manner that traffic which serves these districts is not forced through adjacent or nearby residential neighborhoods.

As explained in the response above, this proposed Amendment will locate industrial development away from residential neighborhoods. Traffic associated with the industrial development will remain on the nearby arterial roadways and interstate. Therefore, traffic serving the development will remain on the nearby major City thorough fares and will not be forced through residential neighborhoods.

Economic Element

Goal 1 BUSINESS AND EMPLOYMENT

Retain, expand and attract industries, companies and businesses that provide high paying jobs with benefits for residents and that would create opportunities for business spin-offs and expansions, particularly those that would establish the City of Daytona Beach as a center for high technology design.

The development proposed by the Amendment will provide Daytona Beach with industrial development in which new industrial companies may establish a presence in Daytona Beach. The Applicant intends to develop an industrial project with significant job opportunities for light industrial, heavy industrial, and office uses, which will attract businesses to this premium location.

Objective 1.1 Retain, expand and attract industries, businesses and jobs, particularly in the City's targeted industries, such that the area average annual wage increases from the previous year.

Targeted Industries include: telecommunications, environmentally clean manufacturing, information technology, medical products, treatment and technology, boating, marine production and supplies, automotive and speed related sports industry i.e. motor sports, golf, tennis, aviation and related events.

This Amendment will allow an industrial development which may attract new industries and businesses to relocate or expand to Daytona Beach. The industrial development will provide the opportunity for location of companies participating in the City's Targeted Industries.

Policy 1.1.8 The EDAB shall encourage development of pre-permitted "shovel ready" building sites.

The proposed Amendment will entitle the Property for development of an industrial project. These entitlements, along with the rezoning being processed concurrently with this Amendment, will result in "shovel ready" building sites that the Applicant may sell to end users or a developer specializing in industrial uses.

Policy 1.1.9 Facilitate and support opportunities for business spin-offs, expansions and/or recruitment particularly in Targeted Industries.

The development proposed by the Amendment will provide Daytona Beach with industrial development which may attract business spin-offs, expansions, and recruitment, including in the City's Targeted Industries.

4.2 Consistency with the Urban Sprawl Rule

Section 163.3177(6)(a)(9)(b), Florida Statutes, provides that a plan amendment shall be determined to discourage the proliferation of urban sprawl if it incorporates a development pattern or urban form that achieves four or more of the following:

(I) Directs or locates economic growth and associated land development to geographic areas of the community in a manner that does not have an adverse impact on and protects natural resources and ecosystems.

<u>Response</u>: The proposed amendment will allow industrial development which will direct economic growth and the associated land development to an area that will complement the existing industrial and commercial developments in the vicinity of the Property.

(II) Promotes the efficient and cost-effective provision or extension of public infrastructure and services.

<u>Response</u>: The Property is located in an area where public infrastructure and services are available, thereby promoting the efficient and cost-effective provision of such infrastructure and services.

(III) Promotes walkable and connected communities and provides for compact development and a mix of uses at densities and intensities that will support a range of housing choices and a multimodal transportation system, including pedestrian, bicycle, and transit, if available.

Response: N/A

(IV) Promotes conservation of water and energy.

<u>Response</u>. The proximity of the Property to existing development will provide for an efficient integration of infrastructure and services to the new industrial development that will require less water and energy than developments in wholly undeveloped areas. Additionally, the Amendment will comply with this requirement as further discussed in Section 5 below.

(V) Preserves agricultural areas and activities, including silviculture, and dormant, unique, and prime farmlands and soils.

Response: N/A

(VI) Preserves open space and natural lands and provides for public open space and recreation needs.

<u>Response</u>: The proposed amendment will allow responsible industrial development on the Property. The development will incorporate open spaces and natural lands in a

manner that complements both the existing nearby industrial and commercial, as well as mitigating any impacts to multifamily facilities.

(VII) Creates a balance of land uses based upon demands of the residential population for the nonresidential needs of an area.

<u>Response</u>: The industrial development on the Property will direct economic growth to an area that will complement the existing industrial and commercial uses in the vicinity of the Property, as well as mitigating any impact to multifamily facilities, thereby promoting a comprehensive mix of uses for existing facilities and future development. Further, this will lead to job growth in the area.

(VIII) Provides uses, densities, and intensities of use and urban form that would remediate an existing or planned development pattern in the vicinity that constitutes sprawl or if it provides for an innovative development pattern such as transit-oriented developments or new towns as defined in s. 163.3164.

Response: N/A

The proposed amendment promotes a development pattern and urban form that achieves five of the preceding eight general policies. Accordingly, the proposed amendment exceeds the urban sprawl standards set forth in Section 163.3177(6)(a)(9)(b), Florida Statutes.

4.3 <u>Land Use Compatibility Analysis</u>

The proposed amendment seeks to amend certain issues presented by the current Future Land Use Map designation. The proposed amendment will not negatively alter the character that exists in the area at the present time. The amendment is intended to allow for improved planning and coordination for development of the Property. The primary uses of the Property will be consistent with the existing uses in the surrounding area, including but not limited to: light industrial, heavy industrial, and office uses.

The uses contemplated by this amendment and permitted through the rezoning of the Property to PD-G are consistent with the existing industrial and commercial development in the vicinity of the Property and will mitigate any potential impacts to nearby multifamily facilities. As noted in Section 3.5 above and further detailed in Section 5 below, the proposed amendment allows the development of the Property in a manner consistent with the Comprehensive Plan. The amendment to change the existing FLU and limit the FAR on the Property is consistent with the existing FLU on the rest of the parcel and will allow for efficient integration of planning and management of the Property. For an overview of the existing FLU, please refer to the existing FLU map attached as Exhibit "F."

5. Concurrency Analysis

5.1 Traffic Data and Analysis

The data and analysis is based on the trip generation results of the existing versus the proposed FLUM and the provision in the Florida Department of Transportation's procedures that state that no analysis is required if the impacts of the proposed FLUM's traffic generation is less than that of the existing FLU. The attached table included in Exhibit "G" indicates that the proposed FAR and densities result in land uses that generate traffic volumes that will not increase the traffic impacts of the existing FLU. The trip generation equations and rates are based on the Institute of Transportation Engineers Trip Generation report, 9th Edition.

5.1.1 Trip Generation for the Current FLU

The trip generation for the current land uses are provided in the attached table included in Exhibit "G". Using the adopted FARs and densities, the gross external p.m. peak-hour trip generation is 258 trips.

5.1.2 <u>Trip Generation for the Proposed FLU</u>

The trip generation for the Proposed FLUM land uses are provided in the attached table included in Exhibit "G". The net new external trip generation is <u>257</u> trips.

5.1.3 Change in Trip Generation

As indicated in the attached table included in Exhibit "G", the trip generation of the proposed FLU is less than the trip generation of the existing FLU.

5.1.4 Trip Distribution

This work product is not required as the trip generation of the proposed FLU is less than the trip Generation of the existing FLU.

5.1.5 <u>Impacts on the 5 Year Level of Service (LOS)</u>

This work product is not required as the trip generation of the proposed FLU is less than the trip Generation of the existing FLU.

5.1.6 Impacts on 2025 Level of Service (LOS)

This work product is not required as the trip generation of the proposed FLU is less than the trip Generation of the existing FLU.

5.2 Sanitary Sewer Data and Analysis

5.2.1 Sewer Facilities

The City of Daytona Beach Waste Water Treatment Plant that will accommodate the waste from this project is located at 3651 LPGA Boulevard. This plant has a capacity of 15.0 MGD. The current maximum monthly average annual daily flow is 8.8 MGD.

5.2.2 Sanitary Sewer Demand from the Current FLU

The current sanitary sewer demand is calculated as follows using the Florida Administrative Code, Chapter 64E-6.008 and the City of Daytona Beach recommended standards:

Table 5.2.2 - Current FLU Sanitary Sewer Demand

Land Use	Area (ac)	Land Use	Proposed Bld, Area	Proposed Units	Type of Use	Per Capita Flow (gal/day)	Average Daily Flow (gal/day)	Peak Daily Flow (gal/day) (Average x 3)
Level 3 Residential	14.65	Level 3 Residential		586	Residential	300	175,800	413,400
Maximum Flow							175,800	413,400

5.2.3 Sanitary Sewer Demand from the Proposed FLU

Table 5.2.3A - Proposed FLU Sanitary Sewer Demand

Land Use	Area (ac)	Land Use	Proposed Bld. Area	Proposed Units	Type of Use	Per Capita Flow (gal/day)	Average Daily Flow (gal/day)	Peak Daily Flow (gal/day) (Average x 3)
General Industrial	14.65	Gen. Ind.	382,892 sf	N/A	General Industrial	0.10 gpd/sf	38,000	114,000

38,000

114,000

5.2.4 Change in Sanitary Sewer Usage

The proposed FLU decreases the possible peak sewer requirements of the site by approximately 175,800 GPD

5.2.5 Impacts on LOS

Combining the current flow to the plant of 8.8 MGD with the proposed maximum peak rate of 0.114 MGD results in a total of 8.91 MGD of flow to the plant. The available capacity of the

Flow

Flow estimates per Florida Administrative Code 64E-6.008

plant is 15.0 MGD, with outstanding flow commitments of 8.8 MGD, therefore the plant has an excess of 6.2 MGD in the estimated daily peak flow maximum. Therefore, there will be no significant impact to the current level of service.

5.3 Potable Water Data and Analysis

5.3.1 Potable Water Facilities

The City of Daytona Beach's Water Treatment Plant is located at 3651 LPGA Boulevard. The capacity of the plant is 24.0 MGD. The current maximum monthly average daily flow is 15.15 MGD.

5.3.2 Potable Water Demand from the Current FLU

The current potable water demand is calculated as follows utilizing the Florida Administrative Code 64E-6.008 (Standard Engineering Practice utilizes sewer flows to represent estimated water demands) and the City of Daytona Beach recommended standards.

Table 5.3.2 - Current FLU Potable Water Demand

Land Use	Area (ac)	Zoning Categories	Proposed Bld. Area	Proposed Units	Type of Use	Per Capita Flow (gal/day)	Average Daily Flow (gal/day)	Peak Daily Flow (gal/dny) (Average x 3)
Urban Transition	14.65	Land Use		586	Residential	300	175,800	413,400
Maximum Flow				П			175,800	413,400

5.3.3 Potable Water Demand from the Proposed FLU

Table 5.3.3A - Proposed FLUM Potable Water Demand

Land Use	Area (ac)	Land Use	Proposed Bld, Area	Proposed Units	Type of Use	Per Capita Flow (gal/day)	Average Duily Flow (gal/day)	Peak Daily Flow (gal/day) (Average x 3)
General Industrial	14.65	Gen. Ind.	382,892 sf	N/A	General Industrial	0.10 gpd/sf	38,000	114,000

Flow estimates per Florida Administrative Code 64E-6.008

5.3.4 Change in Potable Water Usage

The proposed FLU decreases the possible peak potable water requirements of the site by approximately 175,800 GPD

5.3.5 Impacts on LOS

Combining the current flow to the plant of 15.15 MGD with the proposed maximum peak rate of 0.144 MGD results in a total of 15.29 MGD of flow to the plant. The available capacity of the plant is 24.0 MGD, with outstanding flow commitments of 15.15 MGD, therefore, the plant has an excess of 8.85 MGD in the estimated daily peak flow maximum. Therefore, there will be no significant impact to the current level of service.

5.4 Stormwater Data and Analysis

The proposed use is industrial. Existing drainage patterns will be maintained, and all calculations will comply with the current rules specified by the St. Johns River Water Management District and the City of Daytona Beach. This project will attenuate and treat the stormwater for the mean annual and 25 year 24 hour rain event. The site will be developed in accordance with all local, State and Federal regulations. Post development stormwater discharge rates will not exceed pre-development discharge rates.

5.5 Solid Waste Data and Analysis

The nearest solid waste landfill (Tomoka Landfill operated by Volusia County) is 3,400 acres and will not reach capacity until the year 2052. The Tomoka Landfill has sufficient capacity to accommodate the proposed FLUM designation.

5.6 Wellfield Protection Zones

The site does not lay within any wellfield protection zones.

5.7 Reclaimed Water

Reclaimed water is currently available at the subject site.

6. Environmental Analysis

6.1 Surface Water and Wetlands

See attached Exhibit "H", USDA-NRCS Soils Map.

6.2 <u>Vegetative Cover</u>

See attached Exhibit "I", FLUCFCS Map.

6.3 Flood Zone

See attached Exhibit "J", FEMA Flood Map.

6.4 Listed Animal and Plant Species

See attached Exhibit "K", Wildlife Survey Map and Data Tables.

7. Conclusion

The proposed amendment is consistent with the City of Daytona Comprehensive Plan and Section 163.3177, Florida Statutes, as detailed herein. The amendment will permit the efficient integration of planning and management of the Property. The proposed amendment will ensure that the subsequent rezoning of the Property will not include any inconsistent uses with those currently anticipated throughout this area. The amendment will allow an industrial development in an appropriate location where it will be consistent with surrounding uses. Additionally, the concurrent rezoning of the Property to PD-G will ensure development is consistent with the Comprehensive Plan.

ARTICLES OF ORGANIZATION

FOR

INDIGO DEVELOPMENT LLC, A FLORIDA LIMITED LIABILITY COMPANY

The undersigned, pursuant to the provisions of Chapter 608 of the Florida Statutes, does hereby set forth the following for the purpose of forming a Limited Liability Company under the laws of the State of Florida:

ARTICLE I

NAME OF COMPANY

The name of the Limited Liability Company (the "Company") is INDIGO DEVELOPMENT LLC.

ARTICLE II

PRINCIPAL OFFICE AND MAILING ADDRESS

The street address of the principal office of the Company is 1530 Cornerstone Boulevard, Suite 100, Daytona Beach, Florida 32117.

The mailing address of the principal office of the Company is Post Office Box 10809, Daytona Beach, Florida 32120-0809.

ARTICLE III

REGISTERED AGENT AND REGISTERED OFFICE

The street address of the initial registered office of the Company in the State of Florida is 1530 Cornerstone Boulevard, Suite 100, Daytona Beach, Florida 32117. The name of the Registered Agent of the Company at that address is Robert F. Apgar.

Instrument# 2009-009696 # 5
Book: 6314
Page: 1567
Diane M. Matousek
Volusia County, Clerk of Court

ARTICLE IV

MANAGER OR MANAGING MEMBER

The name and address of each Manager or Managing Member is a s follows:

Title:

Name and Address:

"MGRM" = Managing Member

Consolidated-Tomoka Land Co., a Florida corporation Post Office Box 10809 Daytona Beach, Florida 32120-0809

CONSOLIDATED TOMOKA LAND CO.,

a Florida corporation, Managing Member

(Sole Member of the Company)

ACCEPTANCE BY REGISTERED AGENT

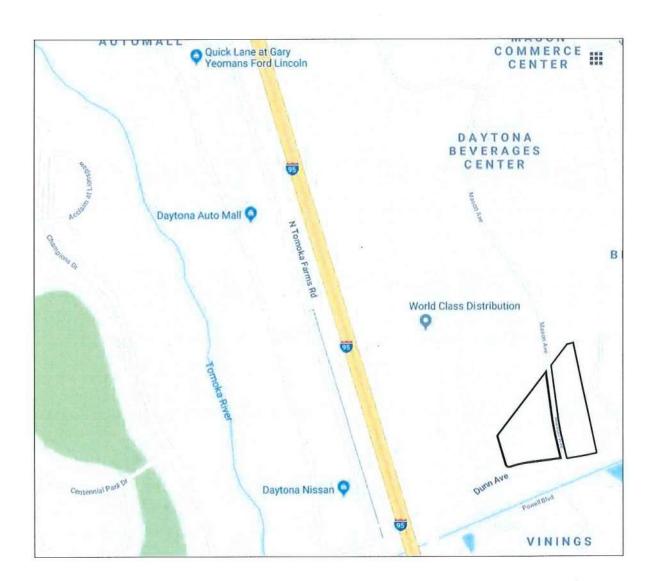

Having been named as the Registered Agent for the above-mentioned Company at the place designated in the foregoing Articles of Organization, I hereby accept such designation and agree to act in such capacity, and I further agree to comply with provisions of all statutes relative to the proper and complete performance of my duties as Registered Agent. I am familiar with, and accept the duties and obligations of, Section 608.415 of the Florida Statutes.

Robert F. Apgar

From:

Matthew West, AICP

Subject:

Project Beta - Comprehensive Plan Amendment @ Mason and Dunn Avenues - Daytona Beach

Date:

December 8, 2017

INTRODUCTION

LTG, Inc. (LTG) has been retained by Vantrust Real Estate, LLC. to prepare a traffic analysis in support of a future land use amendment to the City of Daytona Beach's Comprehensive Plan. The proposed amendment will change the Future Land Use Map Designation of approximately 14.65 acres from Level 3 Residential to Industrial (General Industry) with a neighborhood policy that restricts the maximum floor area ratio (FAR) to 0.6. The subject property is located at the northeast and northwest corners of Mason Avenue and Dunn Avenue.

The methodology and procedures used in this analysis are consistent with the guidelines for the City of Daytona Beach, the Florida Department of Transportation (FDOT) and the Department of Economic Opportunity (DEO).

TRIP GENERATION FOR THE EXISTING VS PROPOSED FLUM DESIGNATION

The trip generation for the maximum development scenarios for both the existing Future Land Use Map (FLUM) designation and the proposed FLUM designation with the associated FAR restriction of 0.6 were calculated using the nationally accepted trip generation software, *TripGen* (10th Edition), prepared by the Institute of Transportation Engineers (ITE).

The existing analysis is based on the existing FLUM designation of Level 3 Residential as outlined in the Future Land Use Element (FLUE) of the City's Comprehensive Plan. According to the FLUE of the City's Comprehensive Plan Level 3 Residential has a maximum density of forty (40) dwelling units per acre. Based on the City's Comprehensive Plan policies, the maximum development scenario under the existing FLUM designation is 586 multifamily dwelling units. As indicated in Table 1, maximum development of the property under the existing land use would generate 258 p.m. peak-hour trips.

Next, the maximum development potential of the requested future land use designation was calculated. Industrial permits a maximum FAR of 0.7, but the comprehensive plan amendment application includes a neighborhood policy which will restrict the property to a maximum FAR of 0.6. Based on this information, the maximum development potential of the proposed future land use amendment is 382,892 square feet of industrial/manufacturing uses. As indicated in Table 1, the proposed development program produces an estimated 257 p.m. peak-hour trips.

Robert A. Merrell III, Cobb and Cole December 8, 2017 Page 2

Table 1
P.M. Peak-Hour Trip Generation Comparison

Project Beta – Comprehensive Plan Amendment										
Time Period	Land Use	Land Use Code	Trip Rate Equation	Size	Units	Percent Entering	Percent Exiting	Trips Entering	Trips Exiting	Total Trips
PM Peak-	Level 3 Residential		T = 0.44(X)	586.00	DU	61%	39%	157	101	25
Hour	General Industrial	140	T = 0.67(/x)	382.89	KSF	31%	69%	80	177	25

Source: ITE TripGen software, 10th Edition

The net change between the proposed future land use designation (Industrial) and the existing future land use designation (Level 3 Residential) are determined as the trips generated by the Existing FLUM subtracted from the trips generated by the proposed FLUM and text amendment. The proposed development program will reduce the potential p.m. peak-hour trips by 1 when compared to the existing FLUM impacts.

CONCLUSION

The study was conducted to evaluate the impact the proposed Comprehensive Plan Amendment would have on area roadways. Since the proposed comprehensive plan amendment reduces the potential p.m. peak-hour generation, there will be no net increase in traffic over what is currently allowed by the City's Comprehensive Plan. Therefore, this Comprehensive Plan Amendment is recommended for adoption. Concurrency and any required mitigation to support a proposed development plan will be assessed in greater detail during the final development permitting process.

I affirm, by affixing my signature below, that the findings contained herein are, to my knowledge, accurate and truthful and were developed using current procedures standard to the practice of professional planning.
